ProPitch helps stadia, training grounds, leagues and associations improve pitch quality, as they seek to present the highest quality playing surfaces and maximise their assets through increased playing time or events.

This maintains the playing quality, consistency and venue brand whilst having a fine impact.

"Lille OSC have been using the ProPitch system since the beginning of season 2020/21 to monitor the quality of the playing surfaces at our training centre. We use the ProPitch testing kit, mobile application and Online Portal. The system is very informative, easy to use and gives the club and ground staff a clear picture of the quality of the playing surfaces. The additional consultancy support provided by ProPitch is of great value and it is a huge benefit to have access to an experienced team of hands on agronomists to aid the quality of our facilities."

*Jérôme Delplanque
Responsible Maintenance
LOSC*

Achieving a **consistent quality standard** for match and training pitches, supports improved performance and player welfare.

If you can measure it, you can manage it.

ProPitch is the market leading, independent, smart pitch management solution for the performance and quality assessment for natural turf pitches.

Our innovative system provides a series of pitch tests that put playing quality at its core. The tests are scored and weighted, to provide a rating system, making it simple to monitor pitch improvement. Quality assurance is an essential part of the natural turf pitch development and management process, guaranteeing its performance.

"Tottenham Hotspur are working with ProPitch to provide pitch assessments at both the Stadium and training ground, we benefit from both having our own ProPitch test kit and also independent assessment undertaken by ProPitch staff. We also utilise the ProPitch Match day report template to provide pitch information to our ground staff, coaches and management team prior to all home matches. The system is excellent and provides a valuable insight to the playing surfaces used by the club.

Our relationship with ProPitch is excellent

*Wayne Billing
Stadium Grounds Manager
Tottenham Hotspur FC*

PROPitch

PROPitch SERVICES

STRATEGY

- Pitch Inspection
- Feasibility Studies
- Budget
- Procurement and Management
- Usage and event modelling
- Risk Assessment

- Fertiliser, pesticide and turf enhancement programmes
- Troubleshooting of problem surfaces

DESIGN & CONSTRUCTION

- Site appraisal and feasibility study
- Design and tendering specifications for construction & drainage
- Site works management

EDUCATION & TRAINING

- Coaching and mentoring

PROPITCH TEST KIT OPTIONS

Self-Assessment Kits and Devices

ProPitch offer different testing kit options for purchase, similar to the kits used by ProPitch consultants undertaking independent pitch assessments. The kit comes in 3 main options. ProPitch Lite, ProPitch and ProPitch Pro. The 3 kits are designed to allow facilities of any budget access to the ProPitch systems and the benefits that smart pitch management can bring. Combined with our online Portal and mobile application for data recording and instant reporting the system leads the market.

ProPitch Lite Kit: - An entry level self-assessment set of equipment that allows you to quickly assess a playing surface for turf quality. The kit includes a soil corer, infiltration ring and prism gauge. Ideal for undertaking the ProPitch Lite assessment

ProPitch Kit: - Our standard self-assessment test kit, allowing you to undertake a ProPitch self assessment covering Playing quality, Physical quality and Turf quality. Included in the kit is a Clegg Hammer, moisture meter and FIFA compliant rotational resistance device among other items. Ideal for undertaking the ProPitch self-assessment

Pro Kit: - Includes all the items of the standard kit plus ball roll, ball rebound and a 3m straight edge to allow accurate evenness assessments to be undertaken. Ideal for undertaking the ProPitch 15 assessment.

PROPITCH ASSESSMENTS

ProPitch Lite

The ProPitch Lite assessment allows grounds managers to quickly gather basic data on turf quality and pitch performance. A fantastic introduction to smart pitch management and data recording.

- Infiltration
- Soil pH
- Moisture Reading
- Total Ground Cover %
- Weed %
- Sward Height
- Mass Root Depth
- Thatch Depth
- Surface Organic Debris
- Appearance
- Sward Colour
- Disease %
- Insect / Pest %

PROPITCH ASSESSMENTS

ProPitch Self-Assessment

The ProPitch self-assessment allows grounds managers to monitor pitch readings and adapt maintenance techniques to help produce the perfect pitch.

- Traction
- Surface Levels
- Hardness
- Infiltration
- Moisture Reading
- Total Ground Cover %
- Weed %
- Sward Height
- Mass Root Depth
- Thatch Depth
- Surface Organic Debris
- Appearance
- Sward Colour
- Disease %
- Insect / Pest %

PROPITCH ASSESSMENTS

ProPitch 15

This is our standard assessment. It can also be undertaken internally with the use of our ProPitch testing kits and ProPitch Application and data portal.

- Ball Rebound
- Ball Roll
- Traction
- Surface Levels
- Hardness
- Infiltration
- Moisture Reading
- Total Ground Cover %
- Weed %
- Sward Height
- Mass Root Depth
- Thatch Depth
- Surface Organic Debris
- Appearance
- Sward Colour
- Disease %
- Insect / Pest %

PROPITCH ASSESSMENTS

ProPitch 18

This is our most advanced testing assessment. It includes the PP15 with the AAA Assessment.

- Surface Deformation
- Shock Absorption
- Energy Restitution

AAA ASSESSMENT

- Ball Rebound
- Ball Roll
- Traction
- Surface Levels
- Hardness
- Infiltration
- Moisture Reading
- Total Ground Cover %
- Weed %
- Sward Height
- Mass Root Depth
- Thatch Depth
- Surface Organic Debris
- Appearance
- Sward Colour
- Disease %
- Insect / Pest %

PROPITCH APP AND PORTAL

Online Portal and Mobile Application

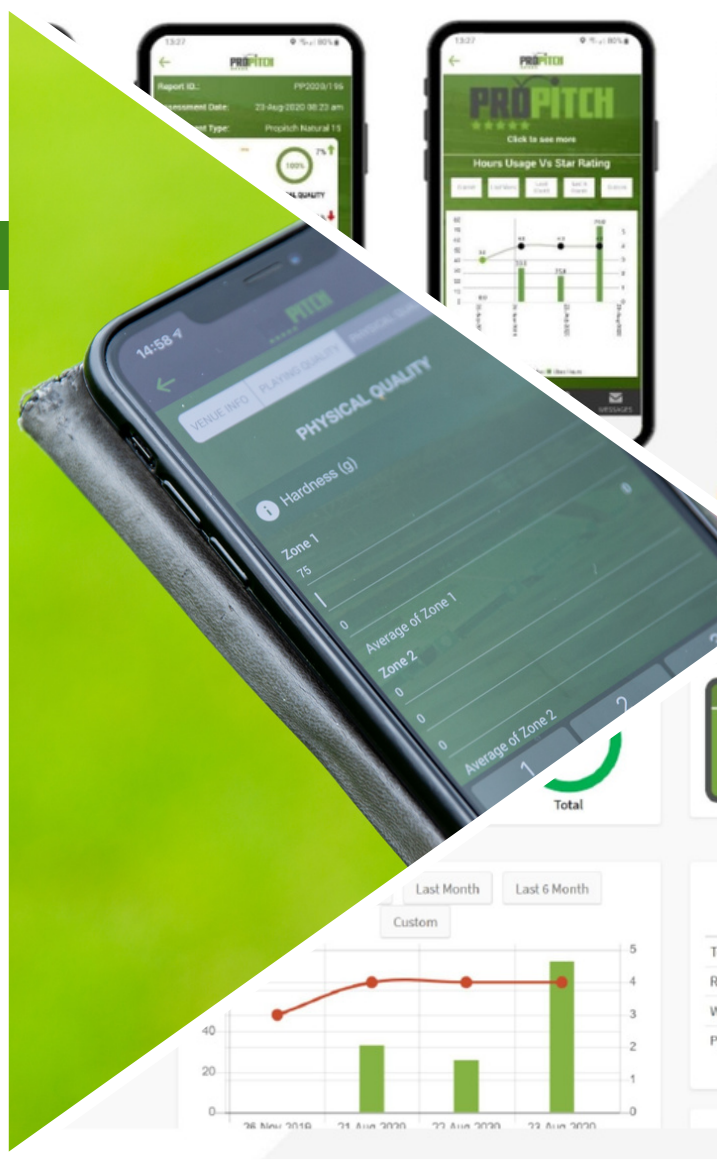

The ProPitch online portal and mobile application are designed to be used in conjunction with our range of self assessment test kits.

Allowing groundstaff to record, collect, report and compare data in an easy to understand and use format. The system produces instant on site reports from the data inputted to the app. the data can then be displayed and shared directly from the app or viewed on the online portal.

Access to your data is controlled by you and can be shared internally in your organisation or externally with contractors, tournament organisers or stakeholders as you see fit.

You measure it, You manage it and You control it.

The software comes in two packages ProPitch Insight and ProPitch Consult.

This pitch has achieved a rating of 4 stars

PROPITCH APP AND PORTAL

Insight

ProPitch Insight provides access to the Mobile application and Online portal.

The insight package provides all the functionality of the system without the remote consultancy support that the ProPitch consult package provides.

Features include:

- Instant reporting
- Data trending
- Data recording
- Access to various assessment types
- Independent assessment requests
- Venue management

PROPITCH APP AND PORTAL

Consult

ProPitch Consult provides all the features of the Insight package with the addition of remote consultancy support provided for assessments undertaken.

The consult package allows our consultants to view assessments uploaded to the system and make observations and recommendations.

Additionally the system gives you access to our "Match day report" template designed to be used on the day of a match to provide a comprehensive report on pitch quality and playability. The ideal assessment for Stadium venues.

Features include:

- Remote consultancy support
- Match day reports
- Bespoke assessments
- Instant reporting
- Data trending
- Data recording
- Access to various assessment types
- Independent assessment requests
- Venue management

PROPITCH CONSULTANCY

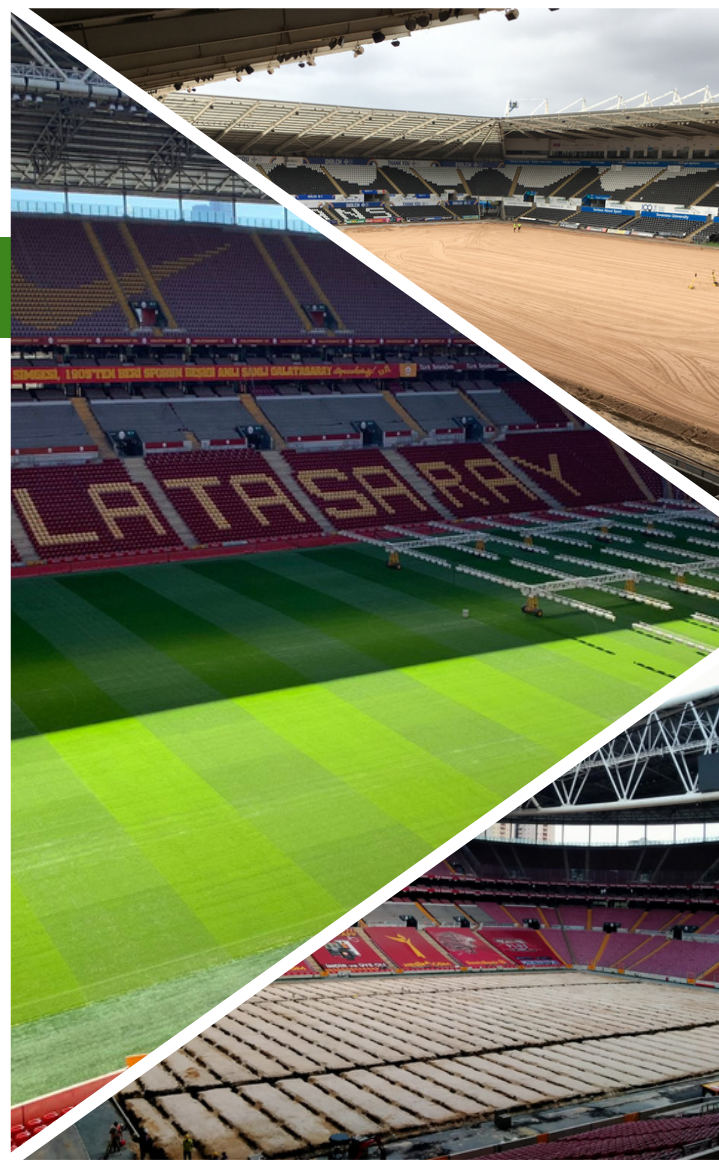

Consultancy services

In addition to the ProPitch system, at our core ProPitch offer independent Consultancy services. Our team specialises in the design, procurement, tendering and project management of facilities and pitches.

An independent consultant, our services in this area include:

- Site appraisal and feasibility report
- Topographical studies
- Design drawings
- Tendering specifications for construction & drainage
- Tender return evaluation report
- Planning applications
- Expert Agronomy advice
 - Bridging calculations
 - Fertiliser plans
- Site works monitoring
- Overall project management on behalf of the client
- Key stage inspections during build
- Final pitch assessment and quality assurance

All these services are available for both new sites and renovations.
