

PITCH RECONSTRUCTION CONSULTANT

July - August 2021

ProPitch provided consultancy services for the pitch reconstruction at the Turk Telekom Stadyumu, the home of Süper Lig club Galatasaray S.K.

Starting with design validation, to monitoring the removal of the old pitch and the installation of the new pitch, our team also provided material quality control.

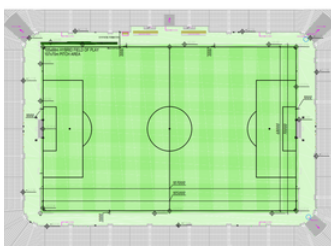

This was under a tight timeline prior to the start of the Süper Lig season and UEFA qualifying games.
